

## Draft Agenda

### **“The new EU Legal Framework on Pesticide Use: National implementation and participation of the Civil Society in Central-Eastern EU”**

Workshop organised by PAN Germany in collaboration with Levego (Clean Air Action Group)  
29 – 30 June 2009 in Budapest, Hungary

The workshop provides information on the implementation of the new **Framework Directive on Sustainable Use of Pesticides (FD)**<sup>1</sup>, which is likely to enter into force at the end of September this year. Strong involvement of groups of the civil society in stakeholder dialogues and in public awareness raising activities will promote serious implementation of the new legal framework into national laws.

PAN Europe and PAN Germany wants to strengthen CSO activities and networking on this issue. PAN Europe has established the working group “NIC”. NIC stands for the key elements of the new legal framework: the establishment of National Action Plans (NAPs), the mandatory implementation of Integrated Pest Management (IPM), and the repercussions on the Common Agriculture Policy (e.g. cross compliance, subsidies). The exchange of information and expertise on these key elements by the participants of the workshop are very welcome in order to identify possibilities of future CSO involvement.

PAN Germany supports and co-operates with organizations of the civil society in Central and Eastern European since 2001 in order to build up capacities on pesticide issues and on participation in pesticide policy. This project and this workshop is kindly financial supported by the Sigrid Rausing Trust.

---
